BEATRIZ MORAIS LARANJINHA

(351) 918 182 172 | beatrizlaranjinha6@gmail.com | linkedin.com/in/beatrizlaranjinha | github.com/beatrizlaranjinha

Profile

Master's student in Computer Science and Engineering, specializing in Security and Privacy at NOVA School of Science and Technology. Interested in cybersecurity, backend development, cryptography, and privacy-preserving technologies.

Education

Master's — **Sep 2026 – Present**
Computer Science and Engineering — Security and Privacy — *NOVA School of Science and Technology*

Bachelor's — **Sep 2022 – Jul 2026**
Computer Science and Engineering — *Universidade da Beira Interior*

Bachelor's (Erasmus Exchange) — **Sep 2025 – Feb 2026**
Computer Science — *Cracow University of Technology*

Work Experience

Associação Estrela de 3 Pontas — **Sep 2022 – Jul 2025**
Monitor — *On-site*

- Worked in a structured, schedule-driven environment, developing strong teamwork and time management skills.
- Supervised groups of children, strengthening communication, responsibility, and problem-solving under pressure.

Projects

DataSafe — Privacy-Preserving Data Management | Java, SQLite, Hibernate, Maven, JUnit

- Developed a Java application using a relational SQLite database and Hibernate ORM to manage and persist healthcare records.
- Implemented access control, GDPR data management operations, and privacy-preserving techniques including k-anonymity and differential privacy.

Zk-Guillou-Guisquater | Rust, Rug, Cryptography

- Implemented fundamental number-theory operations and a simplified version of the Guillou–Quisquater zero-knowledge identification protocol.

CantTouchMe | Go, TypeScript

- Developed an encrypted notebook storing signed notes in a cryptographic hash chain.
- Used AES-128 (CBC/CTR), HMAC-SHA-256/512, and Ed25519 for confidentiality, integrity, and authenticity.

Kaonashi | Solana, Rust, zk-SNARKs

- Developed a privacy-focused voting system on Solana, combining encrypted votes, zero-knowledge proof verification, and rollup-based processing.

Certifications & Conferences

INForum 2026 — Certificate of Participation | INForum 2026 — **Sep 2026**

- Participated in a national conference focused on research, innovation, and knowledge exchange in Computer Science.

IBM Ethical Hacking with Open Source Tools | Coursera — **Dec 2025**

- Hands-on experience wit h Kali Linux, Wireshark, Metasploit, and OpenVAS for network analysis, penetration testing, and vulnerability assessment.

Introduction to ML and Data Science with Python | Universidade da Beira Interior — **Jul 2024**

Technical Skills

Programming Languages: Java, Python, Go, Rust, C, OCaml
Databases & Backend: SQL, SQLite, Hibernate ORM, Maven
Security Tools: Kali Linux, Wireshark, Metasploit, OpenVAS
Formal Methods & Testing: Rocq, Why3
Development Tools: Git, Docker, Postman, JUnit
